ORDER TO SHOW CAUSE
NO. 43-045-001
BEFORE THE BOARD OF
OIL, GAS, AND MINING, DE-
PARTMENT OF NATURAL
RESOURCES, in and for the
STATE OF UTAH

IN THE MATTER OF THE
APPROVAL OF THE NOTICE
OF INTENT AND RECLAMA-
TION PLAN SUBMITTED BY
R.D.M. & S. PARTNERSHIP,
WHITEROCK CLAIMS,
TOOELE AND UTAH COUN-
TIES, UTAH.

THE STATE OF UTAH TO
ALL PERSONS INTERESTED IN
SECTIONS 33 and 34, TOWNSHIP 8 SOUTH, RANGE 3
WEST, SLBM, TOOELE AND UTAH COUNTIES, UTAH.

Notice is hereby given that tentative approval has been given by the Utah Division of Oil, Gas, and Mining to R.D.M. & S. partnership, P.O. Box 314, Orem, Utah 84057, to conduct a surface limestone mining and milling operation on the Whiterock group of claims, numbered 1 to 10, Sections 33 and 34, Township 8 South, Range 3 West, SLBM, Tooele and Utah Counties, Utah. R.D.M. & S. partnership is represented by Mr. Jack Madsen of Provo, Utah. Other partners include: Mr. Darrel L. Ross, Provo, Utah; Mr. H. Clyde Davis, Orem, Utah; and Mr. Lynn Stewart, Stillwater, Oklahoma. The proposed mine is unnamed.

R.D.M. & S. partnership has fulfilled all obligations under the Mined Land Reclamation Act of 1975 (Section 40-8) Utah Code Annotated, 1953, as amended, and tentative approval has been given to conduct surface limestone mining and milling operations with the following procedures:

a) High-grade limestone from the Mississippian Gardison and Mississippian Fitchville Formations will be drilled, blasted, removed, and milled throughout a period of 30 to 50 continuous years. Limestone will be removed from the surface of a dip slope to a stratigraphic depth of 90 feet during this period. Surface soils from the mined slope will be retained if practical. Soil and reject materials will be segregated in separate piles. A site map of the mine is on file with the Division.

b) The residual slope after mining will be left along the natural dip of the formation. The operator will have caused to be made berms, at least 20 feet in horizontal width located every 200 feet along the slope distance. Said berms shall be of consolidated rock as well as a part of the residual formation and shall follow the existing contour at a particular elevation.

Subsc _____ before me this _____ day of

Feb. 17, 1976

25th day of

A.D. 1976

E. c) The seeding, planting, or otherwise necessary revegetating will be performed on the berms upon abandonment and on the mill site when operations have permanently ceased. Plant species to be used are those specified in the reclamation plan.

d) Sufficient fertilizer will be utilized in conjunction with plantings; dictated by soil analysis.

Five years from the final approval of the notice of intent, berms will be evaluated by the Division for the presence of plant support materials (soils). If this evaluation proves that no soil is present on the berms, the operator will spread 4 to 6 inches of soil available from alluvial or colluvial deposits on adjoining claims onto the berms. When the supply of available soil is depleted, as determined by the Division, no further soil spreading will be required.

Before final abandonment, maximum residual slope for bare rock will be 100% (45°). Reject or soil piles will be graded to 30% (17°), or less prior to final abandonment, if any such piles are left. A sign will be placed at the mine stating the mine location, operator, and operator's address.

Any person or agency aggrieved by this tentative decision is hereby requested to submit written protest to the Division of Oil, Gas, and Mining, located at 1588 West North Temple, Salt Lake City, Utah 84116, setting forth factual reasons for his complaint, and thereafter, at a time and place heretofore established, appear before the Board of Oil, Gas, and Mining, to show cause, if any there be, why this plan should not be approved.

DATED this 9th day of February, 1976.

ORDER TO SHOW CAUSE
NO. 43-045-001
BEFORE THE BOARD OF
OIL, GAS, AND MINING, DE-
PARTMENT OF NATURAL
RESOURCES in and for the
STATE OF UTAH

IN THE MATTER OF THE
APPROVAL OF THE NOTICE
OF INTENT AND RECLAMA-
TION PLAN SUBMITTED BY
R.D.M.& S. PARTNERSHIP,
WHITE ROCK CLAIMS,
TOOELE AND UTAH COUN-
TIES, UTAH.

THE STATE OF UTAH TO
ALL PERSONS INTERESTED
IN SECTIONS 33 and 34, TOWNSHIP 8 SOUTH, RANGE 3
WEST, SLBM, TOOELE AND
UTAH COUNTIES, UTAH.

Notice is hereby given that
tentative approval has been
given by the Utah Division of
Oil, Gas, and Mining to R.D.M.
& S. partnership, P.O. Box 314,
Orem, Utah 84057, to conduct a
surface limestone mining and
milling operation on the
White Rock group of claims,
numbered 1 to 10, Sections 33
and 34, Township 8 South, Range
3 West, SLBM, Tooele and Utah
Counties, Utah. R.D.M. & S.
partnership is represented by
Mr. Jack Madsen of Provo,
Utah. Other partners include:
Mr. Darrel L. Ross, Provo,
Utah; Mr. H. Clyde Davis,
Orem, Utah; and Mr. Lynn
Stewart, Stillwater, Oklahoma.
The proposed mine is unnamed.

R.D.M. & S. partnership has
fulfilled all obligations under
the Mined Land Reclamation
Act of 1975 (Section 40-8) Utah
Code, Annotated, 1953, as
amended, and tentative approv-
al has been given to conduct
surface limestone mining and
milling operations with the fol-
lowing procedures:

a) High-grade limestone from
the Mississippian Gardison and
Mississippian Fitchville For-
mations will be drilled, blasted,
removed, and milled throughout
a period of 30 to 50 continuous
years. Limestone will be re-
moved from the surface of a dip
slope to a stratigraphic depth of
90 feet during this period.
Surface soils from the mined
slope will be retained if practi-
cal. Soil and related materials
will be segregated in separate
piles. A site map of the mine is
on file with the Division.

b) The residual slope after
mining will be left along the
natural dip of the formation.
The operator will have caused to
be made, berms, at least 20 feet
in horizontal width located
every 200 feet along the slope
distance. Said berms shall be of
consolidated rock as well as a
part of the residual formation
and shall follow the existing
contour at a particular eleva-
tion.

c) The seeding, planting, or
otherwise necessary revegeta-
tion will be performed on the
berms upon abandonment and on
the mill site when operations
have permanently ceased.
Plant species to be used are
those specified in the reclama-
tion plan.

d) Sufficient fertilizer will be
utilized in conjunction with
plantings, dictated by soil
analysis.

Five years from the final
approval of the notice of intent,
berms will be evaluated by the
Division for the presence of
plant support materials (solis).
If this evaluation proves that no
soil is present on the berms, the
operator will spread 4 to 6 inches
of soil available from alluvial or
colluvial deposits on adjoining
claims onto the berms. When the
supply of available soil is de-
pleted, as determined by the
Division, no further soil spread-
ing will be required.

Before final abandonment,
maximum residual slope for
bare rock will be 100% (45°).
Reject or soil piles will be
graded to 30% (17°), or less prior
to final abandonment, if any
such piles are left. A sign will be
placed at the mine stating the
mine location, operator, and
operator's address.

Any person or agency aggrieved by this tentative deci-
sion is hereby requested to submit written protest to the
Division of Oil, Gas, and Mining, located at 1588 West North
Temple, Salt Lake City, Utah 84116, setting forth factual
reasons for his complaint, and thereafter, at a time and place
hereinafter established, appear before the Board of Oil, Gas, and
Mining, to show cause, if any there be, why this plan should
not be approved.

DATED this 9th day of Fe-
bruary, 1976.
